GRSM's legal depth in our Portland location reflects the tremendous growth and influence of the Pacific Northwest since we established our Oregon office in 2005. Frequent collaborators with our Washington offices, our Portland professionals have a robust practice in defending manufacturers, employers, professionals, and public clients, among other interests in the region.

Our Portland team's defense achievements on product liability matters, including in automotive, heavy equipment, toxic tort, and medical exposures, have earned them a national profile.

Additional notable practice areas include pharmaceuticals and medical devices, environmental and toxic tort, employment law, transportation, and a wide range of commercial litigation. Team members here also have in-depth backgrounds in insurance defense matters, as well as criminal investigation.

GRSM attorneys are leaders in the profession and receive recognition from *Best Lawyers in America*®, *Chambers USA*, and other legal directories. Our Portland team has served on boards and as directors of the International Association of Defense Attorneys (IADC), Product Liability Advisory Council (PLAC), and Oregon Association of Defense Counsel (OADC). We have taught the art of courtroom advocacy at IADC's trial academy.

Our commitment to community includes participation in Leadership Portland, the Multnomah Bar Association, and several pro bono efforts supported by the federal courts in Oregon and the Oregon State Bar.
