As GRSM's founding office, the San Francisco location embodies our growth from a single office into the first full-service law firm in all 50 states. The Jackson Square building, newly renovated in 2024, expands our investment in the Bay Area, and our commitment to collaboration, flexible work arrangements, and technological innovation.

Our San Francisco office supports major areas of legal services: employment, construction, insurance, environmental and toxic tort, maritime, product liability, retail and hospitality, major educational institutions, and more.

Collaboration Hub for a Flexible Workforce

A diverse group of attorneys and professional staff, working at every level of the firm, is based here, including several members of our next generation of executive leadership and administrative teams. The state-of-the-art virtual trial and presentation studio has quickly become a firm favorite.

We are a social group dedicated to fostering a fun and engaging work environment.

The warm atmosphere of our collaboration hub invites moments to step away from your desk and change your scenery to a private roof deck or meet colleagues in our 4,000-sq. ft. “living room” and flexible event space.

Ranked among the largest law firms and private companies in the region, we are proud to be named among *U.S. News*’ Best Companies to Work For. Local civic contributions include longtime sponsorship of the Ladder Down program, which supports the career advancement of local women lawyers.
