OVERVIEW

Our attorneys have significant experience representing manufacturers, healthcare professionals, national trucking companies and other businesses and individuals in wrongful death, traumatic brain injury, paralysis and other serious personal injury claims. We have tried cases to verdict in many states and have extensive appellate experience. We aggressively litigate catastrophic injury claims and frequently succeed in obtaining summary dismissal well in advance of trial. We provide a Rapid Response team that provides immediate response to accidents, including locating and working with appropriate and highly qualified expert consultants and witnesses to address the complex issues involved in these cases.

TRUCKING & TRANSPORTATION ACCIDENTS

Our attorneys are skilled in trying complex and multivehicle accidents and in handling catastrophic injury cases resulting from heavy vehicles colliding with other vehicles, premises or pedestrians. Our Rapid Response Team of GRSM attorneys located around the United States is ready to respond to catastrophic trucking and transportation accidents 24/7, supporting our clients and helping to memorialize and record the accident scene and preserve critical evidence in real time. A rapid, coordinated effort can make the difference between conceding liability and obtaining a defense verdict.

PROPERTY & SECURITY

GRSM is the counsel of choice for the largest and most sophisticated property owners and managers throughout the country, defending them against claims ranging from serious accidents to shootings, sexual assaults and even murders. We also represent many of the largest and most respected private security companies, which are on the front lines of ensuring the safety of customers, tenants and guests at these properties.

HEALTHCARE

We have successfully defended health maintenance organizations, hospitals, doctors, nurses, surgical clinics, long-term care facilities, and other providers against wrongful death, medical malpractice, and other claims through every stage of litigation, including at trial, arbitration or appeal. Our lawyers understand that reputations, livelihoods and careers are at risk. Depending on each client's situation, we take an aggressive defense strategy, seeking to eliminate as many claims as possible as early as possible.
