OVERVIEW

GRSM helps companies of all sizes manage liability and claims resulting from exposure to all kinds of toxic chemicals and environmental liabilities. This experience includes defending clients in injury and death claims and business loss litigation related to PFAS, benzene, butadiene, ethylene glycol, formaldehyde, silica, food flavoring products and other chemicals. Our representation and experience spans all jurisdictions and industries.

We have decades of proven experience with regulated chemicals, toxic waste and other substances and all major environmental statutes. We have a unique combination of insurance experience and direct representation of Fortune 500 companies in nationwide chemical exposure litigation. We have achieved outstanding results for our clients while managing litigation costs efficiently.

With lawyers admitted to practice across the United States, GRSM has nationwide capabilities and we regularly represent companies on a national level. We work with companies of all sizes in almost every industry, with particular depth in manufacturing, energy, real estate and construction.

COMPLIANCE & TRANSACTIONS

GRSM has extensive knowledge and experience in transactions and regulations, including FIFRA, CERCLA, RCRA, TSCA and CADPR, involving PFAS, pesticides, herbicides, fungicides, and related products, and the science, application, and industry practice regarding most classes of these chemicals.
