OVERVIEW

Called upon by transportation and logistics companies for the most complex and catastrophic injury and property damage matters, GRSM attorneys represent major transportation interests, and their insurers, whose operations occur on roads, at sea, on land, and in the air. Our dedicated 24/7 Rapid Response Team provides immediate and crucial guidance in accidents and investigations. We have successfully advocated for clients up to the U.S. Supreme Court and represent innovators and major carriers in their casualty challenges and key business transactions.

GRSM's extensive experience in the transportation industry includes trucking, bus, common carrier, and heavy equipment clients. Our practice covers:

- Catastrophic injury litigation
- Property damage litigation
- Regulatory compliance
- Cargo claims and insurance
- Freight charge collection and classification

- Equipment leasing and finance
- Business agreements and contracts
- Labor and employment
- Safety and environmental matters

Clients rely on our in-depth trial experience and preparation of cases for trial to strengthen their position in high-exposure matters. We have earned a reputation for resolving claims by early motion practice, including demurrers and motions for summary judgment.

Our transportation law bench, with more than 100 attorneys nationwide, seamlessly scales resources and draws from a network of experts when leading catastrophic injury, multiparty litigation, mass tort litigation, and class action lawsuits.

BUSINESS TRANSACTIONS IN TRANSPORTATION & LOGISTICS

GRSM attorneys also advise on transactions, offering a wide range of legal services to providers and users of logistics and transportation services. We regularly counsel on regulations for operators, vehicles and infrastructure, as well as draft contracts of carriage, regulations and relations between carriers and passengers in public transport, shippers and cargo owners.

24/7 RAPID RESPONSE TEAM

When an accident or incident occurs, time and access become critical factors. That's why GRSM formed a 24/7 Rapid Response Team to serve clients, every day of the year, at whatever time an event occurs.

Based across multiple states to maximize coverage areas, our attorneys move quickly and strategically to manage catastrophic trucking and heavy equipment events. GRSM's Rapid Response Team members can:

- Counsel and protect your driver
- Arrange for local adjusters, accident investigation experts, and criminal defense counsel
- Manage claims involving statutes and regulations
- Deal with hazardous material accidents
- Handle media relations and requests from investigative authorities

We have productive relationships with top experts in the field, allowing us to correspond with them to memorialize and record the accident scene in real time.

Transportation clients, including carriers, insurers, shippers, public entities and waste management

groups, look to us for a quick assessment of an accident scene. A rapid, coordinated effort by experienced professionals can help make the difference between conceding liability and winning a defense verdict.
